

Health Literacy Kit: Home Health Technology Equipment List

Atmo Tube

Atmotube PLUS is the perfect fit for measuring indoor air pollution but its portability is the key. Use it in multiple locations: at your home, in your workplace, on a car ride or anywhere else you go.

Tytohome

TytoHome is a lightweight and portable medical exam kit. The TytoCare app gives you an interface between the exam kit and your smartphone or tablet. With these tools, you can collect and send information to a Novant Health professional from your smartphone. Your healthcare provider guides you during the exam.

NETATMO

This personal weather station lets you measure key data about your indoor and outdoor environment. Pull up your weather Details any time, any place using your Android or iOS smartphone, tablet or computer. The smart weather station features a unique set of sensors that let you track your indoor environment as well as the weather outside.

Germ Guardian

BREATHE FRESH AND CLEANER AIR GermGuardian pluggable air sanitizers kill germs and viruses in addition to filtering odors with an optional UV C light to deliver crisp, refreshing air to your home. **POWERFUL AND COMPACT** With a compact plug in design, you can easily get fresher air from any wall outlet in your home or in your office.
